# Photo Printer AP1100

## Easy Photo Printing

## Photolab Quality at Home

## Enjoy instant photo-lab Quality Print at Home

Capture digital photos from a Pictbridge-enabled camera, a mobile phone or a PC and get high quality prints in only 60 seconds per photo!

The Photo Printer makes photography easy for everyone. You don't even need a computer.

Based on Dye Sublimation technology, your Photo Printer offers the same ultra-reliable quality you have come to expect from a Photo Lab. And thanks to the protective coating, your pictures are highly durable, water and fingerprint-proof. You can trust your memories to last forever with digital photo printers.

## Wireless made easy

Cut the cord and connect wirelessly your camera, mobile phone or PC to your Photo Printer. New WiFi\*, Bluetooth\* and Infrared wireless capabilities make sharing and printing photos even more dynamic.

\*Optional WiFi or Bluetooth adapter required.

## Ingenious and Innovative Design

The AP Photo Printer is designed for people looking for a convenient and easy way to print their digital pictures, without using a computer.

Thanks to the new exclusive CLAMSHELL opening system, your printer is smaller in footprint (140 x 200 x 73 mm), lightweight (just 1.35 kg) and larger in cartridge autonomy (75 prints per cartridge).

Your Photo Printer is the must-have accessory for your digital camera, so small, so chic, you'll want to take it everywhere!

## Easy editing right on the Printer

Print the perfect photo, using the One-touch button to benefit from Crystal Image technology, an innovative function correcting all red-eye defects and making your photos naturally perfect!\*

\*Results might be different depending on the quality of the picture.
